11. Questions and fixes

1. Get started with 2ACE

There is nothing to buy online. We first agree the service and the price with you, then we create your account and you log in at `2ace.pl/login`.

1. Tell us about your business: use **Request pricing** on `2ace.pl`, or **Book a call**. Say what you sell, how much you ship and where you sell.
2. We reply the same day, agree the service with you and send a quote in writing.
3. When you agree, we create your account and email you an invitation.
4. Open the email, click the link and choose a password of at least 8 characters. You land in your dashboard.
5. From then on, log in at `2ace.pl/login` with your email and password.

> EXAMPLE
> Anna books a call, tells us she sells ceramic mugs and expects about 900 orders a month, and gets a written quote the same day. She agrees, and we create her account for `Acme Home Sp. z o.o.`. She clicks the link in her email, chooses a password and lands in her dashboard.

If you forget your password

On the login page type your email, then click **Forgot password?**. We email you a link to choose a new one. You can also change your password any time under **Account**.

Your account page

Open `2ace.pl/account` from the menu. You can edit your personal details, your company details, upload a company logo (it appears as your avatar), see invoices, open billing, and change your password.

> EXAMPLE
> Anna uploads `acme-logo.png` under **Company logo**. From then on, her dashboard header shows the logo and "Welcome, Acme Home Sp. z o.o.".

2. Your dashboard

After you log in, `2ace.pl/app` opens your dashboard. The menu on the left (or the burger button on a phone) has these tabs.

TAB	WHAT YOU DO THERE	STATUS
Overview	Greeting, the journey of your goods, a getting-started checklist, and what we agreed with you.	Live
Products	Your catalogue: SKUs, names, barcodes, photos.	Live
Inbound	Tell us what is arriving and when. Follow each delivery.	Live
Inventory	See how many units of each product we hold.	Live
Orders	Place orders by hand or from a CSV file, follow them from reserved to shipped, and add your own shipping label.	Live
Returns	Announce a return, issue the return label, follow it until it is graded, and see every usage charge (labels, handling fees, return fees) with its status.	Live
Imports, Shipment tracking	Fill with real data as imports and tracking open. Shipment tracking numbers will show here and on your orders.	Coming
Storefront	Status of your online shop.	Coming
Team	Give colleagues their own access. For now ask us from the Contact button.	Coming

Tabs that are not live yet say so in plain words. They never show invented numbers.

The getting-started checklist

The Overview lists the next steps: add products, book your first delivery, invite your team. A step turns green when it is done.

Where your goods are

At the top of the Overview, a picture follows your goods from a booked delivery to a shipped parcel. Each step shows a live number, and the steps that have something in them light up in amber with a moving dotted line. Tap a step to open its screen.

STEP	WHAT THE NUMBER MEANS	OPENS
Booked	Deliveries you announced that have not arrived yet.	Inbound
Arriving	Deliveries we are scanning in right now.	Inbound
On your shelf	Units in your own bin that are free to order (not counting units already reserved).	Inventory
Ordered	Orders with their stock reserved, waiting to be picked. A red tag shows orders on hold for missing stock.	Orders
Picking	Orders our team is collecting from the shelves.	Orders
Packed	Orders boxed and waiting for the courier.	Orders
Shipped	Orders handed to the carrier in the last 7 days.	Orders

EXAMPLE

Anna sees Booked 1, On your shelf 136, Ordered 2 with a red "1 on hold" tag, and Shipped 1. The note under the picture says one order is on hold because some stock is missing, and that it reserves itself when her next delivery arrives. She taps Booked to see when that delivery is due.

EXAMPLE

Anna adds MUG-BLUE and MUG-RED, and the "Add your products" step turns green. She books a delivery, and the next step turns green too.

3. Add and manage products

Every product you want us to store needs an entry before you can book a delivery of it.

Add a product

1. Open **Products** and click **Add a product**.
2. Enter a SKU (your own code, up to 60 characters) and a name. The barcode (EAN) is optional but speeds up scanning at our warehouse.
3. Add up to 4 photos. The first one becomes the thumbnail in your lists.
4. Click **Save product**. It shows at once, with 0 in stock.

EXAMPLE

SKU `MUG-BLUE`, name `Blue ceramic mug`, barcode `5901234123457`, two photos. Then the same for `MUG-RED`. Each SKU can be used once in your account. Another company can use the same SKU for its own product.

Change or remove a product

New products appear immediately. Changes to products that already exist are **requests** that our team approves, so your catalogue stays reliable for the warehouse.

1. On the product's row click **Request edit**.
2. Change the name, add another barcode, or choose **Request switch off** or **Request delete**.
3. Click **Send for approval**. The row now says "Waiting for approval". You can click **Cancel request** any time before we decide.
4. We approve or decline. You get an email either way. If declined, the reason shows on the row.

EXAMPLE

Anna renames MUG-BLUE to "Blue ceramic mug 350 ml". The row shows "Waiting for approval: Edit product MUG-BLUE". An hour later Piotr's colleague approves it and Anna gets an email "Approved: Edit product MUG-BLUE". The new name shows in her list.

RULES

A product that was ever on a delivery or in stock cannot be deleted. Ask us to switch it off instead. It stays in your history and no longer appears when you book deliveries.

Photos are the exception: you add or remove product photos yourself, with no approval, because they only describe the product. In the edit panel use **Add photos** or **Remove**. A product holds at most 4 photos.

4. Book and follow a delivery

An inbound delivery is goods on their way to our warehouse. Book it before it arrives so the team knows what to expect.

Book a delivery

1. Open **Inbound** and click **Book a delivery**. Your account must be active and you need at least one product.
2. Set the expected arrival date, the carrier and a tracking number if you have one.
3. Under "What is arriving" choose a product, enter the units and click **Add**. Repeat for each product. Each product can appear once per delivery.
4. Click **Book delivery**.

> EXAMPLE
>
> Expected `10 Nov 2026`, carrier DSV, tracking `DSV-4821937`. Lines: MUG-BLUE × 600 and MUG-RED × 400. The delivery appears as `IN-000012`, status `Booked`, 1,000 units.

What the statuses mean

STATUS	MEANING
`Booked`	We know it is coming. Nothing has arrived yet. You can still request changes.
`Being received`	The goods are at our dock and being counted.
`Received`	Counting is finished and the delivery is closed.
`Cancelled`	The delivery was cancelled.

Change or delete a booked delivery

While a delivery is still `Booked`, click **Request edit** to change the date, carrier, tracking, products or units, or **Request delete** to remove it. Like product changes, these are sent for approval and the delivery stays as booked until we approve. Once goods have arrived, a delivery can no longer be changed.

> EXAMPLE
>
> The supplier can only send 500 MUG-RED. Anna clicks **Request edit** on IN-000012, changes MUG-RED from 400 to 500, and clicks **Send for approval**. She sees "Waiting for approval: Edit delivery IN-000012".

When something is different on arrival

If fewer or more units arrive than you booked, goods arrive damaged, or an item was not on the booking, we record a difference. You see a red line on the delivery, and we email you.

> EXAMPLE
>
> Marta counts 590 good MUG-BLUE and 10 cracked. Anna's delivery now shows: *Differences found: MUG-BLUE: 590 of 600 arrived · MUG-BLUE: 10 damaged*, with links **Photo 1** and **Photo 2** showing the damage. The photo links stay valid for an hour each time you open the page.

5. Read your inventory

Inventory lists every product that has stock or units on the way, with a thumbnail.

COLUMN	MEANING
On hand	Units physically in our warehouse for you, anywhere.
Available	On hand minus anything already reserved for orders.
Awaiting put-away	Arrived but not on your shelf yet: goods that were not on your booking and wait for a decision, or damaged goods held in quarantine. Good goods from a booked delivery go straight to your shelf and show as available.
Incoming	Units on deliveries that are booked or being received.

> EXAMPLE
>
> Marta receives IN-000012: 600 good MUG-BLUE and 10 damaged. Anna sees MUG-BLUE straight away: on hand 600, available 600, awaiting put-away 10 (the damaged units, held in quarantine), incoming 0. Nothing has to be put away: the good mugs are already on her shelf.

> GOOD TO KNOW
>
> You only ever see your own stock. The numbers come straight from our stock ledger, where every unit that moves is recorded.

6. Place and follow orders

Orders are the parcels you want us to send to your buyers. We reserve the stock for each order the moment you place it.

IF WE ASK YOU TO CORRECT AN ORDER

When the courier cannot accept an order's delivery details (for example the recipient's phone number, the postal code or the house number), we email you what to fix and show the same note on the order in your **Orders** tab. Reply to our email with the correct details. We update the order and create the label. Your goods stay reserved and nothing is charged for this.

Place one order

1. Open **Orders** and click **New order**. Your account must be active and your products must be on our shelves.
2. Enter your own order number (optional but recommended), the recipient's **first name and surname** (letters only, for example Jan Kowalski), street **with the house number**, postal code, city, a two-letter country code such as `PL` or `DE` and the recipient's **phone number** (9 digits for Poland). The order is refused until these are right, because the courier's label cannot be made without them. Email is optional. Spaces, +48 and a leading 0 in the phone are fine, we tidy them.
3. Choose each product and quantity and click **Add**. The list shows how many of each you have available.
4. Click **Place order**.

EXAMPLE

Anna places order `SHOP-1001` for Jan Nowak, Prosta 1, 00-001 Warszawa, PL: MUG-BLUE × 2 and MUG-RED × 1. We have both on the shelf, so the order shows *Reserved, waiting to be picked* straight away.

All of it or none of it

We reserve an order only when **every** line can be filled. If one line is short, nothing is reserved, the order goes `On hold` with the reason, and we email you. It is reserved automatically when more stock arrives on our shelves, oldest orders first. Stock that is still in our receiving area, or in quarantine, cannot be sold yet.

EXAMPLE

Anna orders MUG-BLUE × 7 and MUG-RED × 1, but only 6 blue mugs are on the shelf. The order is on hold: *MUG-BLUE: need 7, available 6*. The red mug is not reserved either. When her next delivery is received, the order is reserved by itself.

Import many orders from a CSV file

Every order needs what the courier's label needs. The file must have these columns: `order_ref`, `name` (first name and surname), `phone` (9 digits for Poland), `address` (street with the house number), `postal`, `city`, `country`, `sku` and `qty`. An order with a missing or wrong detail is refused with the reason, and the other orders in the file still import.

1. Click **Import CSV** and **Download the template**.
2. Fill one row per product. Rows with the same `order_ref` become one order. Match products by `sku`. Excel files saved with semicolons work too.
3. Choose the file. You see how many orders are ready. Click **Import orders**.
4. Every order gets its own result line: reserved, on hold, already imported, or the exact reason it failed. The good ones are kept even if others fail.

> EXAMPLE
> A file with `SHOP-1001` (two rows) and `SHOP-1002` imports as two orders. Importing the same file again creates nothing new: both come back as "Already imported".

Cancel an order

Click **Request cancellation**. Like other changes, it needs our approval, and you get an email with the result. Once picking has started an order can no longer be cancelled here.

What the statuses mean

STATUS	MEANING
Received	We have your order.
`On hold, not enough stock`	Part of it is not on our shelves yet. Nothing is reserved.
`Reserved, waiting to be picked`	All of it is set aside for you.
Being picked	Our team is collecting your items from the shelves.
Packed	Your order is boxed, weighed and ready for its shipping label.
Shipped	Your parcel has been handed to the carrier. Showing the tracking number here is coming soon.
Cancelled	The order was cancelled and its stock released.

7. Ship your orders

Every order leaves with a shipping label. There are two ways to get it: you buy it yourself in your dashboard, or you give us your own.

If a label cannot be created because of the delivery details (for example a phone number that is too short), we email you what to correct and show the same note on the order. Reply with the correct details and we fix the order. Nothing is charged for a failed attempt.

What an order costs

Two things are charged per use and shown on your monthly invoice, excluding VAT: the **handling fee** (packing, one per order; the amount is agreed with you) and the **shipping label** (the carrier price plus a fee, shown before you buy). The handling fee is charged when the order ships. You can see every charge, with its status, under **Returns** in **Usage charges on your account**.

> EXAMPLE
>
> In October Acme ships 940 orders. The handling fee for each of them, plus the labels it bought, are all on one monthly invoice.

Buy the label yourself

You choose the carrier. The price is shown before you buy, plus VAT, and it is added to your monthly invoice.

1. Open **Orders** and click **Shipping** under a reserved order.
2. Under **Ship with 2ACE** check the parcel: weight in kilograms and length, width and height in centimetres. It starts from the sizes you entered for your products. Weigh and measure the packed parcel if you can.
3. Click **Get prices**. You see each carrier that can take the parcel (InPost, DPD, DHL, GLS and others) with its price before VAT.
4. Click **Buy** on the one you want and confirm the price. If the price changed meanwhile, you are told and nothing is bought.
5. The panel now shows the label with its tracking number. Click **Download the label** if you want a copy. We print it and stick it on the parcel when we pack.

EXAMPLE

Anna's order ORD-000031 is two blue mugs. The panel suggests 1,75 kg and 12 × 10 × 36 cm from her product sizes. She gets prices: DPD 13,00 zł + VAT, InPost courier 14,50 zł + VAT. She buys DPD, and the label with tracking WB123 appears on the order. At the end of the month her invoice includes 13,00 zł + VAT for it.

GOOD TO KNOW

When we pack the order we weigh and measure the real parcel. If it is clearly bigger or heavier than you entered, the carrier may charge extra: we add that to your invoice, with the reason. Declare the real parcel to avoid it. A label bought here cannot be cancelled in the dashboard: write to us. You cannot cancel an order that already has a bought label. Only owner, operations and staff members can buy. For safety we limit the number of labels per day and the total not yet invoiced; if you reach a limit, the screen says so. If buying is not open for your account yet, the panel offers only your own label.

Or use your own label

If you already have a label for an order (from Allegro, InPost, Amazon or your own carrier contract), give it to us. We print it, put it on the parcel and hand it to the courier. We do not charge for shipping when you bring the label.

1. Open **Orders** and click **Shipping** under the order. It is available while the order is received, reserved, being picked or packed.
2. Click **Choose file** and select the label as a **PDF of at most 2 MB**.
3. Optionally add the carrier name and the tracking number(s), separated by commas. You can add tracking numbers without a file too.
4. Click **Save the label**. You see "Saved" and the label on file. The button on the order now reads **Shipping (own label added)**.

EXAMPLE

Anna sells on Allegro. For ORD-000014 she downloads the InPost label PDF from Allegro, opens Shipping on that order, chooses the file, types "InPost" and the tracking number, and saves. When Marta packs the order she prints Anna's label and sticks it on the box. Marta then marks the order shipped.

Changing or removing the label

Upload another file and click **Replace the label**, or click **Remove**. This works until the order is shipped. After that the order cannot get a label any more.

GOOD TO KNOW

Only owner, operations and staff members of your company can add labels. The file must be a real PDF. If shipping is not set up for your account, the Shipping panel says so and we do not ship your orders. A label from you replaces ours for that order only; we never buy a second label for an order that has yours.

8. Returns

When your buyer sends something back, you announce it here and issue the return label yourself. We receive the parcel, inspect it, put good goods back on your shelf and tell you what happened.

Announce a return and issue the label

1. Open **Returns** and click **New return**.
2. Choose the shipped order the goods came from. The buyer's name, phone and address are filled in from the order: check them, because the carrier collects from this address. Enter how many of each product are coming back and, if you like, the reason. Click **Announce the return**.
3. On the new return click **Issue the return label**, enter the weight and size of the parcel, click **Get prices** and **Buy** the carrier you want after confirming the price. The label is made for a carrier pickup from your buyer's address to our warehouse.
4. Click **Download the label** and send it to your buyer.

What happens next

- When the parcel arrives we weigh it and check every line. A line that is fine goes back on your shelf (grade A) and is available again. A line that is damaged or not sellable (grade B or C) is set aside in quarantine, with a note, and we ask you what to do with it.
- You see the result on the return and receive an email. We aim to finish within 48 hours of arrival.
- We charge one handling fee per return, by the size of the parcel that arrived, on your next invoice.
- You can cancel a return until its label is bought. A return label you bought cannot be cancelled in the dashboard: write to us.

EXAMPLE

Anna's buyer wants to return 2 blue mugs from ORD-000014. Anna announces RET-000003, issues a DPD return label for 13,00 zł + VAT and sends it to the buyer. A week later the parcel arrives: one mug is fine and goes back on her shelf, one is cracked and is set aside. Anna sees "1 back on your shelf, 1 set aside (damaged)" and a handling fee for the return on her next invoice.

GOOD TO KNOW

Only owner, operations and staff members can announce returns and buy labels. The buyer's name must be a first name and surname and the phone a real number, or the carrier refuses the label. If return labels are not open for your account yet, the panel says so and you can send the goods back yourself.

9. Invoices and payments

- **Invoices** are issued monthly and sent to you by email. Invoices issued through our payment provider also appear under **Account** → **Billing and invoices**, each with a link to view or download it.
- **How you pay** is set out in your service agreement.
- **Questions about an invoice?** Use **Contact us** and choose **Billing and invoices**.

GOOD TO KNOW

Invoices carry our company details. Prices are agreed in writing and are quoted without VAT.

10. Contact us

Prefer to talk? **Book a call** at `2ace.pl/book`, in English, Chinese or Arabic. You do not need an account, so guests can book too: pick the language of the meeting, a day and a time (shown in your own time zone), enter your name and email, and confirm. You get an email with a calendar invitation and the meeting link, and reminders 24 hours and 1 hour before. The email has a link to move or cancel the booking. If the meeting link is not ready yet, we email it before the call.

Use the **Contact us** button in your dashboard. A form opens with a topic list that pre-fills a helpful template. You can also write to `hello@2ace.pl` or call `+48 608 180 946`.

TOPIC	USE IT FOR
Book an inbound delivery	Template asks what is arriving, pallets or cartons, supplier, carrier and preferred date.
Add my products	Send a list of SKUs for us to set up.
Import and customs quote	Goods, HS codes, value, origin and transport type.
Add team members	Name, email and role (operations, finance or marketing).
Domain question, Change my plan, Billing and invoices, Something else	Anything else. Write your question in the box.

EXAMPLE

Anna needs a customs quote. She opens Contact us, chooses "Import and customs quote", fills in *HS code 6912, value 18,000 EUR, Ningbo to Gdansk by sea*, and sends. We reply to her account email within one working day, and a copy of her message is emailed to her.

11. Questions and fixes

PROBLEM	WHAT TO DO
I did not get the invitation email.	Check spam. If it is not there, tell us and we send it again.
The invitation link opened the wrong page or has expired.	Open `2ace.pl/login` and click **Forgot password?** to choose a password, or ask us to send the invitation again.
I cannot book a delivery.	You need an active account and at least one active product. Check the Overview checklist and your Products tab.
My edit does not show.	Edits to products and deliveries wait for our approval. Look for "Waiting for approval" on the row.
I cannot delete a product.	It has been used. Request a switch off instead.
Stock shows "awaiting put-away".	Those goods were not on your booking, or were damaged. We contact you about them. Good goods from a booked delivery are available immediately.
I cannot issue a return label.	The return must still be "announced" (no label yet), you must be an owner, operations or staff member, and return labels must be open for your account. The panel says which. The buyer's name and phone must be complete, or the carrier refuses.
I do not understand a charge on my account.	Open **Returns** and look at **Usage charges on your account**: each line names the order or return, the kind (label, handling fee, return fee, credit) and where it is on your invoice. Write to us if something looks wrong.
I cannot add a shipping label to an order.	The order must not be shipped or cancelled yet, you need to be an owner, operations or staff member, and shipping must be set up for your account. The Shipping panel says which one applies. The file must be a PDF of at most 2 MB.
My order says Packed, not Shipped.	It is boxed and waiting for its label. With your own label we mark it shipped as soon as it is handed over; otherwise it turns Shipped when we have bought the label. If it stays Packed for more than a working day, use the Contact button.
